

## SCHOOL SPOTLIGHT – AIRY HILL

A Year 3 picnic based at home.

Seaglass design – a beautiful tree.

Model of a space station made from Lego.

During the summer term we start to think about creating entries for our local village shows, this year it is uncertain whether these will take place. Not to be deterred our school community have launched the 'Airy Hill Country Show' (follow on Facebook) here you will find all the usual categories from baking to waggy dogs and all manner of things in between. The Airy Hill Country Show is open to the anyone and everyone is welcome to enter.

Taking part in a home learning session

# Pupils continue learning while staying at homes

### Here is the latest news from Airy Hill Primary School.

#### Nursery

Nursery 2 have been spending lots of time outdoors, walking, biking, scooting etc.

We have been looking for signs of spring and freezing flowers, planting seeds and making bird feeders.

#### Year 1

Year 1 has its very own Tiger King! Miss Locker's class have been spending their time working hard and making the most of the lovely sunshine.

Lots of children have been working in their gardens; learning new gardening skills, enjoying homemade picnics, playing with toys and even sketching their own flower beds. One family has even created a COVID-19 time capsule, to be dug up in 10 years time!

#### Year 2

Year 2 have been busy in maths looking at length and cm, they have been looking carefully at maths questions but also measuring real life objects in and around their home.

Year 5 pupils create some tasty treats while staying safe at home.

They have also been working hard in English creating their own recounts, as well as writing facts about animals of their choice.

#### Year 3

Year 3 have been busy with their home learning. It is incredible to see their hard work and dedication.

Year 3 members have also been busying themselves with activities such as gardening, yoga, and much more.

One of our Year 3 members has even made a hedgehog hotel for the environment team when

we make it back to school.

#### Year 4

During the last two weeks of term, Year 4 produced excellent work from home carrying on from their topics from this term. They researched climate zones and particular climates.

They designed and researched their own Viking shield and the children became very creative when completing a project that linked to their (sci-fi theme) class topic.

They also enjoyed the fresh air and created their own version of forest schools!

#### Year 5

The pupils in Year 5 have been learning lots at home. They have made bird feeders and observed the birds which have visited them, started growing vegetables from scraps and cooking up some delicious and nutritious family meals. Most importantly they are keeping safe and staying at home.

#### Year 6

Year 6 have been really busy continuing with their maths work over our virtual learning platform and have been using videos and activities to explore ratio.

In English they have continued to develop their comprehension and have been creating descriptive narratives based on their previous World War Two topic.

As wider learning, the children have been learning a little about evolution and will continue with this in the coming weeks and have explored rationing and events and safety measures during the Blitz.

All of the children in Year 6 have shown so much dedication during these uncertain times and we are extremely proud of their resilience and mature attitudes.

Doing some gardening and learning new skills.

Year 1 drawing.
